

Knowledge Process Outsourcing and Big Data Operations Partner

Strategic Intelligence for Data-Driven Enterprises

WHO WE ARE

We are an international Knowledge Process Outsourcing and Big Data operations group delivering specialised data, analytics and intelligence teams to enterprise organisations.

We enable organisations to transform complex data environments into structured strategic intelligence by embedding knowledge teams that manage and optimise data ecosystems at scale.

Datalake operates as a strategic extension of your internal intelligence infrastructure.

OUR POSITIONING

**Datalake is not a project vendor.
We are a strategic intelligence operations partner.**

- ❖ Dedicated data and analytics teams
- ❖ Embedded Big Data operational units
- ❖ Managed knowledge workforce models
- ❖ Enterprise intelligence delivery frameworks

Our services empower organisations to scale data maturity without internal recruitment complexity or operational overhead.

OUR MISSION AND ACTIVITIES

Mission

To convert enterprise data into measurable business value through structured knowledge delivery and intelligent data ecosystems.

Core Activities

Big Data and AI

Knowledge Outsourcing

Data Engineering

Enterprise Platforms

DevOps & Cloud

Data Governance

Strategic BI

Intelligence Optimisation

KEY STRENGTH INDICATORS

25+ Enterprise Clients

Trusted by major organizations.

130+ Specialists

Data and Intelligence experts.

Multi-country Model

Global operational delivery.

Long-term Contracts

Stable enterprise partnerships.

SLA-driven

Structured governance.

Proven Scalability

For large environments.

WHY ORGANISATIONS CHOOSE DATALAKE

- ❖ Ready-built Big Data and analytics teams
- ❖ Scalability without recruitment burden
- ❖ Structured KPO governance
- ❖ SLA-based performance control
- ❖ Enterprise-grade data operations
- ❖ Long-term strategic partnership model

We provide intelligence as an operational asset.

OUR CORE SERVICE DOMAINS

Knowledge Process Outsourcing

Specialised data teams embedded into operations.

Big Data Operations

Architecture and infrastructure for large-scale ecosystems.

Advanced Intelligence Systems

Predictive analytics and machine learning intelligence.

Technology Ecosystem

Foundation

Hadoop Spark Kafka Cloudera

Languages & DB

Python Scala SQL NoSQL Oracle
MongoDB

DevOps

Kubernetes Docker Jenkins Terraform

BI & Platforms

ServiceNow Tableau Power BI Enterprise
Cloud

Built for mission-critical environments.

BNP PARIBAS – FRANCE

Cloud Migration Factory

OBJECTIVE

Accelerate cloud infrastructure transformation through automation and secured deployment.

DATALAKE CONTRIBUTION

Design and implementation of cloud migration factory powered by CI/CD automations.

IMPACT

- Improved deployment speed
- Reduced infrastructure complexity
- Enhanced operational resilience

technology used: Terraform Docker Kubernetes Jenkins AWS

SOCIÉTÉ GÉNÉRALE – FRANCE

Enterprise Big Data Intelligence

OBJECTIVE

Enhance fraud detection and financial risk intelligence capabilities.

DATALAKE CONTRIBUTION

High-volume data pipeline implementation supporting real-time analytics frameworks.

IMPACT

- Strengthened decision intelligence
- Real-time risk monitoring
- Increased data reliability

RISK

technology used: Hadoop Spark Scala Kafka Python Tableau

EMKAN FINANCE – SAUDI ARABIA

Enterprise Big Data Intelligence

OBJECTIVE

Transform large-scale financial data into structured, real-time intelligence for enhanced decision-making and regulatory compliance.

DATALAKE CONTRIBUTION

Enterprise Big Data architecture and automated intelligence pipeline enabling end-to-end data processing and visibility.

IMPACT

- 99.9% data accuracy
- 99.99% system availability
- Faster decision cycles
- Stronger compliance readiness

RENAULT – FRANCE

Digital Platform Modernisation

OBJECTIVE

Modernise internal reporting platforms to improve transparency and operational efficiency.

DATALAKE CONTRIBUTION

Deployment of secure web and mobile auditing solution enabling live reporting systems.

IMPACT

- Enhanced visibility
- Reduced response time
- Improved transparency

technology used: Angular Java Spring Boot React Native PostgreSQL

SERVICE MANAGEMENT PROGRAM

Enterprise ITSM Integration

OBJECTIVE

Centralise service management workflows across enterprise divisions.

DATALAKE CONTRIBUTION

Integration of ServiceNow ITSM with automated governance and workflow orchestration.

IMPACT

- Unified service operations
- Improved process efficiency
- Optimised response times

technology used: ServiceNow REST APIs Power BI Agile Frameworks

OUR CLIENTS

Trusted by multinational organisations and government entities. Chosen by institutions that demand intelligence excellence.

WHY PARTNER WITH DATA LAKE

Enterprise ITSM Integration

- ❑ Proven KPO delivery model
- ❑ Elite Big Data engineering capability
- ❑ International operational footprint
- ❑ Saudi market strategic presence
- ❑ Enterprise governance control
- ❑ Future-ready intelligence architecture

STRATEGIC INTELLIGENCE OPERATIONAL MASTERY

Datalake enables organisations to transform data complexity into strategic clarity and sustainable enterprise performance.
